

GEO Certified®

GEO Certified® Report La Finca Golf

Prepared by independent verifier Iñigo Sobrini

Certified by GEO Foundation: 2026
Recertification due: 2029

GEO Certified®

 **GEO
Foundation**
Sustainability in and through golf

“The facility continues to be managed by experienced professionals who apply high environmental standards in their day-to-day operations. Since the previous certification, the course has strengthened its sustainability performance through updated biodiversity work, habitat mapping and management, communication materials on local fauna, naturalisation of selected areas, soil improvement with natural mulch, the introduction of autonomous electric robotic mowers, cleaner mobility supported by plug-in electric vehicles, and the installation of solar panels for buggy charging. These actions, together with ongoing agronomic support, responsible water use, careful turf and chemical management, and the protection of valuable wetland-related species, demonstrate continued progress and a clear commitment to further improvement during this recertification cycle.”

Iñigo Sobrini
(GEO accredited independent verifier)

Introduction

GEO Foundation is pleased to confirm that La Finca Golf has successfully achieved GEO Certified® status for its outstanding work to foster nature, conserve resources and support the community.

GEO Certified® is the most respected certification for golf, based on a credibly and transparently developed modern sustainability Standard of best practice.

La Finca Golf has:

1. Met the required certification criteria for sustainable golf operations
2. Successfully completed the official third-party verification process
3. Successfully passed the final evaluation by GEO Certification Ltd. (autonomous subsidiary of GEO Foundation)

GEO agreed with the conclusions of the official verification report, that, having achieved all mandatory criteria; and with specific Continual Improvement Points (CIP) set for the future and Critical CIP's (CCIPs) to be reviewed at recertification, La Finca Golf should be awarded GEO Certified® status.

For the certification period stated above, La Finca Golf can therefore claim a position as a leader in advancing sustainability in golf – making important contributions in protecting nature, conserving resources and strengthening communities.

The GEO Certified® Report that follows comments on the actions undertaken against the criteria, as observed by the independent verifier during the assurance process.

Certification is nearly always the result of a dedicated team effort resulting in many practical and valuable social and environmental results around the golf course, maintenance facility and clubhouse. These dedication and leadership qualities are an important part of ensuring the resilience of the golf facility and the golf industry into the future and also as part of society's wider effort to pull together for people and planet.

We congratulate all involved.

Jonathan Smith
Founder and Executive Director, GEO Foundation
GEO Certification Ltd. Board Member

Kelli Jerome
Executive Director, GEO Foundation

Carole Kerrey
Director, Certification and Credibility,
GEO Certification Ltd.

Verification and Certification

Verification

The official third-party audit was carried out by an independent verifier, accredited by GEO to undertake verifications of golf facilities applying for certification.

Verification involves reviewing practices and data, using the International Voluntary Standard for Sustainable Golf Operations as the guide to ensure comprehensive and consistent evaluation of performance. A detailed verification report is submitted for evaluation by GEO Certification Ltd, a subsidiary of GEO Foundation.

Certification

GEO Certification Ltd, an autonomous subsidiary of GEO Foundation [both not-for-profit entities], undertook a full review of all content submitted through the OnCourse® online platform and the report submitted by the verifier, ensuring:

- Comprehensiveness – activities undertaken touched on all elements of the Standard
- Consistency – that the verification approach was balanced, well weighted and with consistent depth of evaluation across each theme
- Accuracy - matching the verification report with evidence submitted by the golf facility to ensure statements and claims were accurate

GEO Foundation is an international not-for-profit founded to advocate, support and reward sustainability in and through golf. Over more than ten years, the group has worked collaboratively with dozens of golf industry associations and government and non-government organisations around the world, to help golf become a sustainability leader, striving for a net positive social and environmental impact. In addition to managing and assuring GEO Certified®, GEO Foundation also provides a suite of credible, practical programmes for golf facility management, new golf developments and golf tournaments called OnCourse®, often delivered in partnership with national golf bodies. Find out more at www.sustainable.golf

Credibility

GEO Certified® is part of the ISEAL Alliance, a group of the world's foremost credible certification systems including Fairtrade, Rainforest Alliance, Forest Stewardship Council, Marine Stewardship Council and many others. GEO Foundation earned and retains full membership of the ISEAL Alliance global association following a rigorous evaluation against the ISEAL Codes of Credibility in Sustainability Standards and Certification. The ISEAL Codes cover standard-setting, assurance, and monitoring and evaluation. Find out more at www.isealliance.org

Verifier's Report

The Sustainability Agenda for golf covers the following themes and action areas:

THEMES	ACTION AREAS
Nature	• Habitats & Biodiversity • Turfgrass management • Pollution prevention
Resources	• Water • Energy • Materials
Community	• Partnerships & Outreach • Golfing & Employment • Advocacy & Communications

Included below are the observations made by the Independent Verifier against each item in the Standard.

NATURE			
N1 Habitats and Biodiversity			
Objectives	Requirements	Mandatory Practices	Verifier Notes
N1.1 Understand the site and surroundings	N1.1.1 Sound understanding of the nature and landscape value of the site	General knowledge of the wildlife and habitats on the site	An “Environmental restoration and biodiversity enhancement report” has been prepared by Sergio Tirado (Golf & Birds), from R&A Sustainable Agronomy program. Natural, or naturalized, habitats have been mapped, so special management is provided in this area. A poster and a leaflet have been produced about the fauna present on the course for dissemination purposes.
	N1.1.2 Knowledge of legal designations for protected areas, habitats and species	Identify rare, protected or endangered species found on the golf course; Understand legal responsibilities for landscape protection and special area designations, if applicable	No legally protected areas onsite, but some interesting wetlands. Nevertheless, several species of interest can be found. Breeding, wintering or foraging species, are frequently detected, probably coming from nearby protected areas such as the Lagunas de La Mata and Torrevieja wetlands or El Hondo. Special mention should be made of the Malvasía cabeciblanca / white-headed duck (malvasía cabeciblanca (<i>Oxyura leucocephala</i>), which is listed as ‘Endangered’ throughout Spain, has the highest conservation priority in Europe, and is included in the Birds Directive, Annex I, the Bern Convention, the Bonn Convention/CMS-AEWA and other national protection lists
	N1.1.3 Sound understanding and respect for cultural heritage	Protect any archaeological, historical or cultural designations on the site, if applicable	No specific elements on site.
N1.2 Opportunities to naturalise the golf course	N1.2.1 Measures taken to identify and minimise the required area of managed turfgrass	Monitor patterns of play to identify underutilised areas of turfgrass	New natural habitat environmentally managed increased in 2,30 ha since 2021. Holes 2 and 11 have been redefined to better integration with natural surroundings and less management requirements.

N1.3 Actively create and manage habitats for wildlife	N1.3.1 Projects to create and manage habitats in the best way for wildlife and golf	Prioritise native species of varying size and structure when planting Prioritise native trees and shrubs when planting Prioritise native aquatic species of varying size and structure when planting Establish mowing buffer zones next to water bodies and wetlands	Monitoring and nature-based management of natural areas has been convened with R&A Sustainable Agronomy program.
N1.4 Conserve key species	N1.4.1 Practical conservation measures for priority species	Follow local best practice to protect or attract endangered, protected or rare species found on site	Bare soil areas are now being covered with natural mulch to improve soil quality. CIP: Install nest boxes for insectivorous birds and raptors, as well as bat roost boxes. Install floating islands for waterbirds.
N2 Turfgrass			
N2.1 Maintain optimum turfgrass and soil health	N2.1.1 Appropriate turfgrass varieties adapted to climatic and other geomorphological factors	Select appropriate grass species for the climate	95% of the turfgrass is Bermuda grass; only greens are seeded with C- (cool season) species.
	N2.1.2 Practices to maintain good soil structure and condition	No specific international requirement, however, identify course management and agronomic activities and look for continual improvements	An integrated disease management programme developed by an experienced agronomist is in place, correctly applied and regularly measured. Bare soil areas are now being covered with natural mulch to improve soil quality.
	N2.1.3 Careful and responsible fertiliser application throughout the year to avoid over-fertilisation	Test and monitor soil pH; Follow legal requirements when timing fertiliser applications Ensure staff are fully qualified to use fertilisers Ensure staff use appropriate protective equipment Regularly calibrate and test applicators	Water and soil are regularly analysed; management program being adapted to the results obtained. Grass growth of greens is continuously monitored by measuring the grass Volume extracted in every cut, adapting water and fertilizer doses continuously.

	N2.2 Prioritise mechanical maintenance	N2.2.1 Non-chemical pest, disease and weed management	Sharpen mowing blades; Remove surface moisture; Change hole locations frequently	Non-chemical actions are implemented when necessary. Autonomous electric robotic lawn mowers have been introduced.
	N2.3 Use chemicals responsibly	N2.3.1 Application of chemicals only when necessary to prevent or cure defined / identified turf health issues	Identify and track pest and disease hotspots, including sensitive areas Scout the course daily for early signs and symptoms Accurately diagnose to determine the cause of weeds, pests and diseases	Only curative agrochemicals are applied. Possible problems are well defined, and in case of appearance, early local applications are made. Applications and results are correctly monitored
		N2.3.2 Application of chemicals with full safety precautions	Use legally registered and approved products; Prefer products for the specific weed, pest or disease; Follow legal requirements; Ensure staff are fully qualified to use pesticides; Ensure staff use appropriate protective equipment; Regularly calibrate and test applicators; Dilute and dispose of leftover product on untreated areas of amenity turfgrass	Everything concerning agrochemicals is well managed, under experienced agronomists control, with fully legal and safety requirements compliance.
	N3 Pollution Prevention			
	N3.1 Prevent pollution across the entire site	N3.1.1 Practical measures to ensure pollution risks are minimised from golf course operations	Document procedures for emergency spill responses ; Retain no-spray/no-spread buffer areas next to water bodies and wetlands; Retain no-spray/no-spread buffer zones in and around ecologically sensitive areas	Buffer zones surrounding wetlands. Emergency action protocols in place.

	N3.1.2 Practical measures to ensure pollution risks are minimised from clubhouse operations	Formal wastewater discharge agreement, if applicable	Hazardous materials are correctly stored in the maintenance area. Waste (hazardous and non-hazardous) are correctly managed by authorized agents.
	N3.1.3 Practical measures to ensure pollution risks are minimised from maintenance facility operations	Wash machinery over an impermeable, leak-free surface; Mix and load pesticides and fertilisers over an impermeable, leak-free surface; Triple rinse pesticide containers and applicators	Good practice impermeable pesticide mixing and loading area. Good practice pesticide container and applicators rinsing.
	N3.2 Safely manage hazardous substances	N3.2.1 Legal compliance in the storage, handling, application and safe disposal of all hazardous substances	
		List of hazardous substances, made available to authorised staff; Product and material data safety sheets; Well ventilated concrete or metal building; Impermeable, leak-free flooring; Sufficient storage capacity; Spill containment kits; Secondary containment e.g., bunds or drip trays; Emergency wash area, as per local requirements (body shower and / or eye wash station); Hazardous substances safely collected by a registered company or body ; Follow any additional legal requirements	Hazardous materials, including fuel, stored over impermeable floors, with secondary containment. In compliance with all legal requirements
		N3.2.2 Legal compliance in the storage and handling of fuels and gases	
		Tank secured to a horizontal, flat, non-combustible surface; Secondary containment of fuel in the event of spills e.g. bunds and drip trays;	Hazardous materials, including fuel, stored over impermeable floors, with secondary containment. In compliance with all legal requirements.

		Inspection of storage tank(s) at least quarterly, if required; Fire extinguisher in the immediate area	
N3.3 Responsibly manage waste / storm water	N3.3.1 Appropriate wastewater usage, treatment and discharge	Impermeable, leak-free surface; Treatment as per local requirements (oil, grease and / or clipping separation); Formal discharge agreement, if applicable	Wastewater discharge to general grid, with discharge license from Municipality. No onsite treatment applied.

RESOURCES

R1 Water

Objectives	Requirements	Mandatory Practices	Verifier Notes
R1.1 Minimise water demand	R1.1.1 Measures to reduce the need to consume water	Select appropriate grass species for the climate e.g., drought and disease tolerance; Target irrigation to essential playing surfaces; Prioritise native, drought tolerant species for landscaping and planting	Irrigation areas are reduced to minimum (holes 2 and 11 redefined to reduce watering surface). Irrigation system yearly monitored to prevent mis functioning.
R1.2 Maximise water efficiency	R1.2.1 Practical measures to use water more efficiently on the golf course	Schedule irrigation based on informed assessment of soil moisture and weather forecasts; Evaluate new irrigation technologies e.g., central control, precision sprinklers etc.;	Local weather station connected to irrigation software to adjust daily water doze. Moisture sensor is used regularly in different zones, to adjust software accuracy.

		Provide staff training on efficient irrigation practices; Adjust sprinklers to playing surfaces only	
	R1.2.2 Practical measures to use water more efficiently in buildings	Monitor and record water consumption (bills, flow meter etc.); Encourage water conservation practices amongst players and staff	Water consumption is recorded. All possible saving measures are applied.
R1.3 Source water responsibly	R1.3.1 Measures towards alternative, lower quality sources of water	Water abstraction permit, if required; Report water consumption to environment agency, if required	Irrigation water obtained 100% from Torrevieja water treatment plant.
R2 Energy			
R2.1 Reduce energy demand	R2.1.1 Measures to reduce the amount of energy consumed in golf course maintenance	Naturalise non-playing areas to reduce mowing and other energy intensive inputs	Autonomous electric robotic lawn mowers have been introduced for rough areas.
R2.2 Maximise energy efficiency	R2.2.1 Measures to use energy and fuels more efficiently in buildings	Monitor and record energy consumption (bills, meters etc.)	Monthly monitoring of energy consumption to improve savings. The resort has received support from public funds (MOVES III programme) for the purchase of plug-in electric vehicles, promoting cleaner mobility within the facility.
R2.3 Source energy responsibly	R2.3.1 Measures to source alternative, renewable forms of energy	Understand the energy mix of your electricity supplier; Explore possible greener energy providers	Solar panels have been installed on the clubhouse to recharge golf buggies.
R3 Materials			
R3.1 Reduce materials demand	R3.1.1 Products and materials selection based on necessity, including opportunities for recycled, reused and locally sourced alternatives	No specific international requirement, however, identify activities to reduce the demand for materials and look for continual improvements	No active measures adopted yet. CIP: Implement a Club R-R-R (reduce-recycle-reuse) Strategy.

R3.2 Purchase responsibly	R3.2.1 Commit to sustainable purchasing practices	Favour responsible, lower impact products	No active measures adopted yet. All purchases are conducted by the nearby hotel, in charge of these policies. CCIP: Please implement sm ethical/environmental purchase policy (with or without the nearby hotel).
R3.3 Reuse and recycle	R3.3.1 Waste stream separation for maximum recycling and re-use opportunity	Put in place a recycling separation system, according to local rules and availability; Clear, simple and visible bin signage; Monitor and record weight of waste for each stream e.g. invoices, bills etc.	Waste is separated in different fractions, and managed separately
R3.4 Demonstrate legal compliance	R3.4.1 Compliance with all local and regional waste management regulations	Authorised waste collector for general, hazardous, industrial and green waste, if required	In compliance with all waste regulations.

COMMUNITY			
C1 Health & Wellbeing			
Objectives	Requirements	Mandatory Practices	Verifier Notes
C1.1 Improve health and wellbeing	C1.1.1 Benefits to human physical and mental health from golf and facility activities	Plans in place to respond to incidents and emergencies	The club actively implements all national, regional and local legal requirements.
C1.2 Be open and inclusive	C1.2.1 Inclusivity and diversity in membership and visitor policies	Membership policies free from discrimination across age, gender,	Important discounts for children, youth and seniors.

		sexual orientation, religion, and ethnic background	
C1.3 Employ fairly, safely and provide career opportunities	C1.3.1 Ethical and legal employment, working conditions and professional development	Adopt an equal opportunity recruitment and hiring policy; Follow all relevant legislation and best practice for hiring and employment; Follow all relevant legislation and best practice for worker safety	The club actively implements all national, regional and local legal requirements
<u>C2 Outreach & Inclusion</u>			
C2.1 Diversify access and provide multifunctionality	C2.1.1 Social and recreational activities at the facility	No specific international requirement, however, identify multifunctional activities and look for continual improvements	Commercial club with a strong social events calendar
C2.2 Provide for volunteering and charity	C2.2.1 Opportunities available for volunteering and support of charities and good causes	No specific international requirement, however, identify activities to support volunteering and charity and look for continual improvements	Annual events conducted to get funds for local charity institutions.
C2.3 Establish active community partnerships	C2.3.1 Positive and constructive engagement with neighbours, the local community and other groups	No specific international requirement, however, identify partnerships and community activities and look for continual improvements	CIP: Create an environmental committee with active club users / stakeholders.
<u>C3 Communications & Advocacy</u>			
C3.1 Engage staff and golfers	C3.1.1 Communications activities that raise awareness and understanding amongst members and visitors	Involve staff and committees in sustainability efforts; Involve golfers in sustainability efforts; Post sustainability information in the clubhouse and / or on the golf course	A poster and a leaflet have been produced about the fauna present on the course for dissemination purposes. CIP: Include environmental information on the website

C3.2 Celebrate and promote sustainability	C3.2.1 Activities that raise awareness and engage people in the wider community	Share at least 3 Highlights on sustainable.golf	Commercial website is available. CIP: Improve communication actions with users and local agents.
C3.3 Follow a journey of continuous improvement	C3.3.1 Measures to help track, review and improve sustainability and climate action	Put measures in place to ensure that OnCourse can be updated annually	Confirmed.

Golf and Sustainability

Among all sports, golf has a particularly close relationship with the environment and communities, golf facilities can bring many benefits to people and nature - from the protection of greenspace and conservation of biodiversity; healthy recreation for all ages; local supply chains; and jobs, tourism and other forms of economic value.

Adopting a more sustainable approach is also good for golf. It's about presenting a high-quality golf course and providing a memorable experience in natural surroundings. It's about being as efficient as possible. And it's about supporting the community in a range of ways that bring increased recognition, respect and contact.

At a broader level, it's important that golf credibly demonstrates its commitment, and its social and environmental value – strengthening the sport's image and reputation for the long term.

Golf facilities that participate in OnCourse®, an international sustainability initiative assured by the non-profit GEO Foundation, are taking a comprehensive approach and striving to be leaders in the community.
