

The focus of this renovation project was to improve the quality of the golf course, as well as the ease and efficiency of its maintenance. Through this work, there's hope that the club will become one of the premium clubs in the region. Surrounded by Noida's busy streets, the golf course offers a welcome flash of green amid the city.

Having spent time on site in 2024, it was clear there were significant opportunities for the club to step up and become a flagship, not only in the region but across the country. These renovation works are the first step on a long journey — one that will see Noida Golf Club become a blueprint for sustainable golf in India.

Project Timeline

2023/24

- Vijit Nandrajog (Golf Design India) appointed as golf course architect for the renovation project.

Q2 2024

- Participation in the Sustainable Golf Renovations process begun and a kick-off meeting and workshop with project team to plan and identify possible future projects.
- GEO visit the Noida GC with the project team and Vijit to see the property and the current condition of the golf course. Together with the team they identify the opportunities and challenges the site presents.

Q3 2024

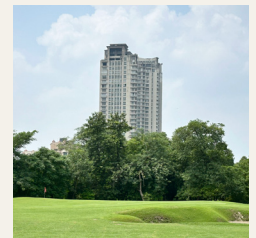

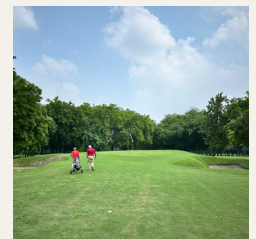

- Construction work on site ramped up as major renovation work on irrigation, drainage, grass, bunkers and vegetation management all took place. These works would continue over the next two years as a phased approach was taken.

Q2 2026

- The majority of the initial renovation work on site is completed.
- GEO spend time with the golf course architect to catch up on the construction process and any changes to design and plans that occurred.

Q3 2026

- GEO submit the final Sustainable Renovation Roadmap to Noida Golf Club, highlighting the renovation process to date and the future challenges and opportunities the club can tackle over the next 20 years

Sustainable Golf Roadmap

The Roadmap assesses the current sustainability performance, efficiency and opportunities for the course. The purpose of the document is to provide a springboard for future upgrade plans to ensure the course is as sustainable and efficiently managed as possible. Within this roadmap GEO identified:

- 14 key area where sustainability and efficiency can be improved prior to any works being carried out.
- 6 'Priority Projects' that would have a positive impact on sustainability performance of the golf course.
- A further 9 supporting projects that can be implemented in a phased approach over the next 10-20 years. These will also have positive impacts on the course's sustainability performance and increase its wider contributions to the local environment and community.

The Project Team

The renovation process at Noida Golf Club was a collaborative effort, with everyone pulling in the same direction to achieve the best outcome for the club. Below is a list of those organisations that collaborated on this:

- Noida Golf Club
- Golf Design India
- GEO Sustainable Golf Foundation (Non-profit)
